696 Virginia Road
Concord, MA 01742-2751

This public notice is notification that the Cape Arundel dredged sediment disposal site (<http://www.nae.usace.army.mil/damos/mapsinfo.asp?myName=Cape%20Arundel>) will no longer be available for use as of January 10, 2010. This is due to the fact that Cape Arundel is an undesignated site under the Marine Protection, Research, and Sanctuaries Act and therefore, by law (Public Law 102-580, WRDA 1992), became subject to only two five-year periods of use unless it was designated formally as a disposal site. January 10, 2010 represents the end of the second of the (non-consecutive) five-year periods.

This affects future permit actions, federal project plans, as well as issued permits that may have authorization to use the site. Permits issued prior to this date will need to complete their work before the deadline or will need to be modified for an alternative site.

The Cape Arundel Disposal Site (CADS) is located approximately 2.8 nmi (5.1 km) southeast of Cape Arundel, Maine. The site consists of a 500 yd diameter circle centered at 43° 17.805' N, 70° 27.170' W (NAD 83). The bottom topography within and adjacent to the site is characterized by a north-south trending trough running 1 km in length and 50 to 250 m wide. This trough has a maximum depth of 43 m and a silt/clay bottom mixed with fine sand. It is flanked by hard rock ridges shoaling up to 30 to 32 m in depth. A total of approximately 1,320,000 yd³ of sediment has been deposited at this site since 1985.

JENNIFER L. MCCARTHY
Chief, Regulatory Division

If you would prefer not to continue receiving Public Notices, please contact Ms. Tina Chaisson at (978) 318-8058 or e-mail her at bettina.m.chaisson@usace.army.mil.
